H-triple-M Team

- **project name :**

Keep Food

- **Discription :**

This project aims to develop an app that helps users manage leftover food and reduce waste by providing smart suggestions and alerts to use food before it expires. The app offers statistics and reports on food waste and guides users to consume food efficiently.

- **Objective :**
1. Reducing food waste by 5%
2. Provide surplus food to families in need and charitable organizations.
3. Create an efficient connection between households, restaurants, and charities to meet the needs of the less fortunate quickly and effectively.
4. To establish a comprehensive and sustainable system that integrates technology, philanthropy, and environmental practices, while delivering tangible economic and social benefits.

- **Team :**
1. Project Manager
2. Market Research
3. Business Analyst
4. Security Specialist
5. Software Architect
6. Software Development
7. Full Stack Developer
8. Frontend Developer
9. UI/UX Designer
10. Backend Developer
11. QA Engineer
12. Marketing Manager
13. Event Coordinator

- **project manegers :**
  1. Hanan
  2. Mariam
  3. Mai
  4. Mina

- **Stakeholders :**
  1. Donors
  2. Delivery Partners
  3. App Users
  4. Project Team
  5. Media and Content Creators
  6. Competitors
  7. Critics of Food Redistribution
